Report on One Day Seminar on
"Need of Electronics Engineer in Industry"

Dated : 3rd March, 2017

Organised by : EXTC Department

Time : 9.30 am to 4.00 pm

Speaker's Name: Mr. Sanjay Chaudhari Director of Electronics Study Center

Venue : R21, Phase 1, Atharva College of Engineering

Coordinators : Mahalaxmi Palinje/ Ritu Sharma

In recent times engineers with quality knowledge is decreasing. Students lack the basics and as a result fail to be productive people. With a view to address this issue the EXTC department and IEEE Atharva student chapter had organized a seminar on 'Need of electronics in industry' on 3rd March 2017. It was conducted by Mr. Sanjay Chaudhari of the Electronics study centre, Nasik. It was especially designed for S.E students so that they realize that a great career has its roots in strong foundations. Sir was very patient and started off with the working of a simple DMM and then moved on with other devices. He explained the function and application of all the basic electronic components and was kind enough to show the demo and working of all the instruments that he took up. He encouraged students to get familiar with the fundamental components so that they get into core electronic firms in future. Sir motivated students to get hands on practice to improve their skills.

The seminar ended with vote of thanks by Prof. Mahalaxmi Palinje and thanking sir for his valuable insight and the IEEE team concluded the seminar by thanking the students for their active participation and cooperation.
