Dated : 9/2/2018

Time : 3pm to 5 pm

Organised by : EXTC Department

Venue : R10, Phase 1, Atharva College of Engineering, Atharva Education complex , Malad Marve Road , Charkop Naka , Malad (W), Mumbai 400095

About the Seminar :

The seminar on technical paper writing was conducted which covered the purpose to communicate specific ideas, and everything about the paper should contribute to this goal. If any part of the paper does not do so, then delete or change that part. You must be ruthless in cutting every irrelevant detail, however true it may be. Everything in your paper that does not support your main point distracts from it. A paper should communicate the main ideas of your research (such as the techniques and results) early and clearly. Then, the body of the paper can expand on these points; a reader who understands the structure and big ideas can better appreciate the details. A technical paper is collaborating your research and summing it up in sequential manner. The reader should not encounter any surprises, only deeper explanations of ideas that have already been introduced. It's particularly irritating when an abstract or introduction states
